In their many forms, time-travel is a rather common theme in science fiction. We've seen it used in a number of mediums: movies, comic books, video games, etc. As such, it's a fairly easy concept to grasp, and it can become a very muddled one, as seen in many of the failings of plot in mainstream media. Like most great films, we've taken the concept of time travel and, instead of confusing it with this media, applied it as its own entity, independent of the rules of time. However, we've followed the same basic rules of relativity that the great physicist Albert Einstein put forth. In fact, we've borrowed many concepts from his work. But we've also expanded upon it a great deal, so that it doesn't just contain time travel, but also allows the player to do anything they'd like. However, it is important to emphasize that the core of the game is a story-driven experience; there are no real "lure of battle" aspects, since you're not going into a battle, except for boss battles. Instead, it's about the journey you will experience as a time-traveller. You will explore a variety of environments, and perform a number of basic actions: Fighting - This is done through a system of actions, based on a system similar to Zelda, where you have certain actions you can perform and certain attacks you can perform. It's designed to have a level of variety, and not be too 'pixel-perfect' with the controls. Running - You will be running across certain environments. These environments include difficult to navigate areas, as well as a few that are more 'action-oriented.' For example, you may be running through a small forest where fighting is not an option, but where you're forced to run and jump to avoid the dangers. You'll be collecting items along the way, and solving environmental puzzles as well. Using Items - The game allows you to interact with your environment, sometimes turning barriers into doors, or triggering switches and prompts. Sometimes, you'll find items, and you'll be able to use them. For example, you may find a campfire, and using it will eventually earn you a campfire for each fire you build with it. Using food gives you hunger, and you can use this hunger to affect how much you can run, or how much health you have. Jumping - You'll be doing a lot of jumping, especially early in the game

up there with cracking my skull open with a rock. I'm thinking he's been really lucky. He'll be fine. Hey look, his first T-shirt! Everyone else was pretty snazzy with theirs. He was just too cute to leave to chance. This has been a crazy ride and has been tons of fun doing this. I really hope everyone enjoys the adventure as much as we enjoy bringing it to you. Please, if you're reading this, I'd really love to hear what you think. Thanks to everyone for being so great and helpful with this project. It's been a blast. And while you're at it, go check out the rest of the game's blog. ( Also, if you want to keep up with the latest, go the VOD page ( for some great tech videos and updates on the game! Thanks again, and as always, Happy Gaming! -Kev I've finally gotten it all finished up and am proud to present you with my last effort in the form of Exile's End Activation Code d41b202975

## Exile's End

screenshots: More videos: The best part of Exile's End is that it's all done in Unity, which means it should be extremely easy to play and mod. ## What's new:

**is a massive webcomic series told from Mina's point of view. It's about her life as an exile with her brother Kerrie and their friend Crell, while living in a fascist city-state called the People's Republic, defending and taking down rival superpower Earth Republic. The series began in 2013, and finishes in 2024. Alternatively, it's also a polylight song about Westeros and the books by George R. R. Martin, set to AC/DC song "A New Way To Die". Hmm, excuse me for a moment while I Google "Norman Borlaug" and then immediately ask, "Where did Borlaug's name come from?" No wait, better question: What is happening here? Is the world about to be given the gift of widespread artificial famine? Well, what do you know, that's my favorite thing to do! Kill people and get away with it! (Think of that, you thought I'd actually say that. You'll be sorry, once I've gotten started.) Season 6 part 1 Hey, so, I told you we'd take a break over wintertime, and we have! Because you know, big bits of the country actually grew a little over November. The People's Republic received Han China's surrender (or lack thereof, really) a few days ago, and reality as we know it has barely**

**breathed. If that sounds harsh, it's not. We're taking our time to finish the job in 2020. However, wintertime is also a perfect time to acknowledge the difficult topics that are broached in the series. I've now come up with what I consider to be the definitive list of sexy aliens and monsters, and have no idea why I believed it wasn't enough. Also, the rankings are in order of most likeably space-going-overlooked-for-tasteful-humanoid-breasts-squealing -down-to-gorilla-like-number of boobs (you know that thing I wrote about earlier? I'm explicitly guaranteeing that right here). Oh, and a few words, both about the drawing and about writing. First off, I'm very excited to announce that Exile's End will be making its debut on ComicVine in the near future, so please give it some attention there! Secondly, I'm also excited to announce that starting next week, I**
